Professional Summary

Fullstack Engineer with 7+ years of commercial experience developing web applications, SaaS platforms, and user-focused digital products. Strong frontend expertise in React, Next.js, and TypeScript, complemented by backend development with C#/.NET, Node.js, Express.js, and SQL.

Experienced in delivering features across frontend and backend, integrating REST APIs and real-time communication, and working within microservices, Backend-for-Frontend, and microfrontend architectures. Combines engineering expertise with a background in UI/UX design, automated testing, and product analytics.

Currently contributing to a large-scale recruitment platform serving millions of users, including AI-powered Talent Assessment, application workflows, real-time functionality, and product experimentation.

Uses Claude Code and Playwright to build AI-assisted development workflows that connect implementation with automated verification and iterative improvements.

Technologies & Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, SCSS, responsive design, accessibility, component architecture, microfrontends

State Management: TanStack Query, Redux, Redux Toolkit

Backend & Data: C#, .NET, ASP.NET Core, EF Core, Node.js, Express.js, REST APIs, SQL, MySQL, Sequelize ORM

Architecture & Integration: Microservices, Backend-for-Frontend (BFF), API integration, WebSockets, real-time communication, object-oriented programming, design patterns

Testing: Jest, Vitest, Playwright, unit testing, end-to-end testing, automated verification

UI & Styling: Material UI, Tailwind CSS, Bootstrap, UI/UX design

Analytics: Amplitude, Tealium, Adobe Analytics, event tracking, product experimentation

Tools & Practices: Git, Docker, Webpack, Vite, Claude Code, Agile/Scrum, code reviews, technical planning, requirements gathering, AI-assisted development

Commercial Experience

The Stepstone Group Polska — Fullstack Engineer

Nov 2025 – Present | Warsaw

Developing recruitment and application features within a large-scale platform serving millions of users, using React, Next.js, TypeScript, and C#/.NET.

- Develop responsive interfaces and application flows with React, Next.js, and TypeScript, focusing on usability, performance, and maintainability.
- Develop and maintain backend functionality in C#/.NET, contributing to API endpoints and business logic supporting application workflows.
- Deliver features across frontend and backend within a microservices architecture, integrating UI components with backend services and BFF APIs.
- Contribute to AI Talent Assessment, integrating AI-generated qualification questions tailored to job offers into selected application flows.
- Implement real-time communication for AI-powered workflows, including status updates and frontend integration with backend processing.
- Use TanStack Query and Redux to manage server state, client state, and asynchronous interactions.
- Work with microfrontend architecture and shared packages within a distributed application environment.
- Clarify requirements with product managers, designers, analysts, and engineers, translating business needs into technical solutions.
- Implement unit tests with Jest and end-to-end tests with Playwright.
- Implement analytics events, interaction tracking, and associated data attributes using Tealium and Adobe Analytics.
- Conduct product experimentation with Amplitude and collaborate with analysts to validate tracking accuracy.
- Use Claude Code for feature implementation, investigation, refactoring, and development automation.
- Build Playwright-based feedback loops that enable AI-assisted workflows to execute tests, inspect failures, and iteratively refine implementations.
- Participate in code reviews, architectural discussions, and improvements to engineering practices.

Księgosoft Sp. z o.o. — Frontend Developer

Aug 2022 – Jun 2025 | Warsaw

Developed an accounting module that evolved into a more independent product initiative within the company.

- Built and maintained accounting interfaces using React and TypeScript.
- Integrated frontend features with the company's core invoicing application and backend APIs.
- Implemented complex business workflows in collaboration with backend developers and business analysts.
- Improved component architecture, code quality, and consistency across application interfaces.
- Contributed to the evolution of an integrated module into a more independent application.
- Participated in feature planning, technical discussions, and code reviews.
- Improved user experience through reusable components and consistent interaction patterns.

Fakturownia Sp. z o.o. — Frontend Developer

Nov 2021 – Jul 2022 | Warsaw

Developed a data-intensive accounting module integrated with a Ruby on Rails backend.

- Implemented accounting features and interfaces using React and JavaScript.
- Integrated frontend components with backend APIs and handled data-intensive business workflows.
- Collaborated with senior developers and business analysts to translate requirements into application functionality.
- Improved application stability and maintained technical documentation.
- Participated in Agile planning, technical discussions, and regular team reviews.

Fakturownia Sp. z o.o. — Frontend Developer / Designer

Jul 2019 – Oct 2021 | Warsaw

Combined frontend development with UI/UX design for a SaaS invoicing platform.

- Built and maintained application interfaces using React, JavaScript, HTML, and Sass.
- Developed and maintained jQuery-based functionality alongside React components.
- Designed and implemented marketing landing pages and email templates.
- Collaborated with marketing and development teams to deliver customer-facing features.
- Improved interfaces based on user feedback and support requests.
- Applied user-centered design principles to application views and interactions.

IBM — Learning and Development Intern

Nov 2018 – Jan 2019 | Wrocław

- Processed and analyzed training data.
- Supported internal learning initiatives and maintained documentation.
- Collaborated with stakeholders in an Agile environment.

Piotr Wagner A3D Architekci — Graphic Design Intern

Jul 2015 – Oct 2015 | Łomża

- Created architectural visualizations.
- Designed promotional materials, including posters and leaflets.

Personal Projects

Belle & Co — Fullstack E-commerce Application

Fullstack portfolio application combining a React/Next.js frontend with a Node.js/Express backend and MySQL database.

- Implemented product browsing, filtering, shopping cart, and checkout flows.
- Integrated Stripe payments.
- Developed backend functionality with Express.js and Sequelize ORM.
- Implemented responsive interfaces and SEO improvements.

Technologies: React, Next.js, TypeScript, Redux, Node.js, Express.js, MySQL, Sequelize, Material UI, Docker, Stripe, SCSS

https://portfolio-dev-ewelinamakowskas-projects.vercel.app/en/projects/belle_and_co

Portfolio Website

Personal portfolio built with React, Next.js, and TypeScript.

- Developed responsive interfaces with Tailwind CSS.
- Implemented server-side functionality using Next.js API Routes and Resend.

Technologies: React, Next.js, TypeScript, Tailwind CSS, Next.js API Routes, Docker, Resend

Website: <https://portfolio-dev-ewelinamakowskas-projects.vercel.app/en>

Education

University of Łomża

Engineer's Degree — Informatics
2012–2016

Białystok University of Technology

Graphic Design
2016–2018

Languages

Polish — Native

English — Advanced (C1)

Personal Interests

Cycling, hiking, learning guitar, digital painting

Consent

I hereby consent to the processing of my personal data by the recipient of this resume for the purpose of recruitment for the position for which I am applying.
